MORE GREENHOUSE JOY FOR LESS

You’ve always been captivated by the joy of homegrown tomatoes, and the thought of experimenting with unique chilli varieties has sparked your curiosity. The idea of a garden space where you can step outside with the children, sow seeds together, and watch your vegetables flourish, is a dream. Or maybe you’ve just moved into your first home with a garden and are looking for a meaningful project. Perhaps you’re in a new phase of life with more time for yourself, or you want to make the most of a small outdoor space in the city.

You might be a beginner, unsure whether you have “green fingers”, or simply curious if greenhouse life is something for you. Our entry level greenhouses are perfect for the novice gardener –something manageable and affordable. A Halls greenhouse is the right place to begin: practical, welcoming, and designed to support your first steps into growing your own.

With Halls, you get more greenhouse for less – and more joy from your garden.

WHICH GLAZING SHOULD YOU CHOOSE?

Halls greenhouses are available in up to three different glazings, and some models are available in plain aluminium, powder-coated green or black frames. 

On the different product pages, you’ll find the available options.

* A few panes of glass are divided by an H strip.

ABOUT HALLS

Founded in 1934, Halls Greenhouses began by manufacturing poultry houses.

In the 1970s, Halls made history by pioneering “flat-pack”, self-assembly aluminium greenhouses – setting a new standard for home gardening.

To this day, Halls is producing affordable greenhouse solutions, since 2009, as part of the Juliana Group.

Juliana Group is a leading global supplier of quality residential greenhouses and embraces the three greenhouse brands Juliana, Halls, and Gabriel Ash.

POPULAR

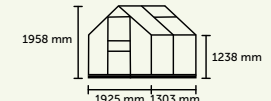

PRODUCT INFO

Just like the name suggests, the Halls POPULAR is one of our most popular greenhouse models - and for good reason.

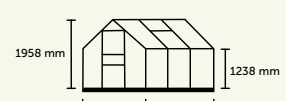

It's the ideal choice for beginners or anyone with a small to medium-sized garden where space needs to be used efficiently.

With up to 6.2 m² of growing space, there's plenty of room for vegetables, herbs, and flowers – while still leaving space to move around comfortably.

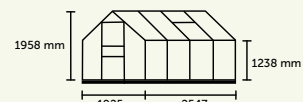

A practical sliding door and one or two roof vents (depending on size) ensure easy access and effective ventilation – creating a healthy and stable growing environment.

HALLS QUBE

Strength meets design – with signature box section profiles. QUBE is an innovative greenhouse range launched in 2019, which combines modern, simple design with unique features.

The square box section profiles, which inspired the name of the range, provide a strong, stable structure that blends effortlessly into its surroundings. QUBE is a modern classic, offering the freedom to add your personal touch and create a truly unique outdoor space.

The QUBE range consists of QUBE 6, QUBE 8, and QUBE SQUARE, which are free-standing greenhouses with a single or double sliding door. Additionally the range offers the QUBE LEAN-TO designed for walls.

Halls QUBE greenhouses are produced in our factory in Odense, Denmark.

A strong and lasting base plinth is key for a durable greenhouse. We recommend the original steel base plinth, specially designed to fit the QUBE models and easy to assemble to avoid building your own.

QUBE LEAN-TO

PRODUCT INFO

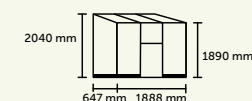

QUBE LEAN-TO greenhouses let you make the most of an unused wall, shed or part of your terrace – giving your greenhouse dream a place to grow.

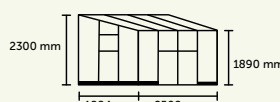

During the day, the wall absorbs warmth from the sun and releases it into the greenhouse in the evening. This creates a milder internal climate and extends the growing season.

OPTIMISE WITH ACCESSORIES

Style your greenhouse with shelves, staging, ventilation or cresting to suit your needs and growing style. Some accessories fit all models, while others are model-specific.

Flip to the next page to see exactly which accessories are compatible with each greenhouse model – and discover the full range of accessories at HallsGreenhouses.com.

NEW

CRESTING FOR ICON

Inspired by classic British greenhouse design, cresting adds an elegant, timeless detail to your ICON greenhouse. Originally developed to prevent birds from perching on the roof, this decorative feature also pays homage to Halls' 90-year heritage of traditional craftsmanship. A subtle yet striking addition, cresting enhances the classic character of your greenhouse and brings a sense of history to your garden. See pages 34-35 for Item no.

LOUVRE

Improves airflow by letting warm air out and fresh air in. Replaces a full glass panel with a combination of louvre slats and fixed glazing. Manually adjustable for optimal ventilation and made from toughened glass. See pages 34-35 for Item no.

NEW

G-CLIPS

G-Clips are an upgraded solution for securing glass panels, offering a more secure grip than traditional glazing clips. They hold the glass firmly in place and contribute to a stronger, more durable greenhouse over time. Item no. HR01980 - 20 pcs
Item no. HR01981 - 50 pcs.

NEW

CAPPING FOR ICON

Capping gives your greenhouse an elegant, streamlined look and enhances both stability and protection of the glass edges with a clean, uniform finish. A rubber seal ensures the glass fits tightly, and the outer strips hold it securely in place. See pages 34-35 for Item no.
